Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague as to what structural feature are being claimed by the claimed "partition interface" or "agent". Additionally, the claim is not clear what type of product or structure is formed by the claimed "compound derivative".

Claim 4 is vague as to what method steps are being performed by the claimed "partition interface" or "agent". Additionally, the claim is not clear what method steps are intended to create the claimed "compound or a derivative of the compound".

Claims 5-9 make reference to first, second and third fluids that are not defined in claim 4 or 7 from which they depend.

Claim 9 is vague and indefinite as to what method steps are contemplated to insert the "barrier plug". Additionally, it is not clear what type of structure is intended by the "barrier plug".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1743

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Manz et al., Yager et al.(USP 5,716,852)

In light of the 35 USC 112 issues, the invention is best understood by the Office as a method and apparatus for the analysis of an analyte in a fluid where a liquid reagent is added to the sample in a capillary medium where a result is detected.

Manz et al. teach a miniature electroosmotic device that continuously drives sample and reagent through a capillary medium for continuous chemical analysis. The first column of page 262 teaches mixing fluorescein and sample in the gel medium and subsequent analysis by a detector. This has been read on the claimed microfabricated device, the capillaries have been read on the claimed conduit, the fluorescein on the claimed agent, the detector on the detector and the interaction of the fluorescein and the sample in the gel on the claimed "partitioning".

Yager et al. teach in column 7-8 a detection system and method of use for the determination of at least one physical property. The claimed conduit has been read on channel(100). The "agent" has been read on the indicator stream(70). The "partitioning" has been read on the diffuser indicator area(110).
